

## Zemo Partnership NEWS

11 September 2023

### Zemo to refocus efforts on developing clear pathway to zero emission mobility for UK

Following a strategic review to coincide with Zemo's 20<sup>th</sup> anniversary, the Partnership is announcing the creation of a new **Zero Emission Mobility Taskforce** which aims to become a leading authority on the policies and pathways needed to achieve a successful transition to net zero road transport in the UK.

Progress towards the targets will be benchmarked and monitored through the creation of a series of Zemo **Zero Emission Mobility Roadmaps**.

Zemo will harness its convening powers, developed over two decades, to engage the widest range of stakeholders in this endeavour; not just representatives of the Partnership's existing (c240) members, but those representing government (at all levels), industry, road user & consumer groups, NGOs and other sector experts.

Zemo is uniquely placed to make this happen; building on the Partnership's success and experience over the last two decades; drawing on the trust and respect that has been established and driving the cross-sector collaboration that's part of Zemo's DNA and vital to our sustainable transport future.

Zemo is inviting all those interested in developing a zero emission transport system for the future to join and take part.

Focused around Zemo's existing Working Groups, Zero Emission Mobility Roadmaps will be produced for:

- Personal Mobility
- Public Mobility

- Moving Goods & Services
- Sustainable Fuel Supply
- Infrastructure Supply
- Vehicle Supply

To introduce the plans, Zemo is holding three webinars on the following dates:

- **12 September** (10.00–12.00) Workshop One: Personal Mobility & Net Zero
- **14 September** (11.00–13.00) Workshop Two: Decarbonising Public Mobility
- **19 September** (10.00–12.00) Workshop Three: Moving Goods Sustainably

**Those interested in joining and finding out more can register via [this link](#)**

#### NOTES TO EDITORS

Zemo Partnership ([www.zemo.org.uk](http://www.zemo.org.uk)) is a public–private partnership working to accelerate a sustainable shift to low carbon fuels and zero emission vehicles. Around 240 organisations are engaged from diverse backgrounds including automotive and fuel supply chains, vehicle users, academics, environment groups and others. The Partnership was established (as LowCVP) by the UK Government and leading stakeholders in 2003.

Zemo’s ZEM roadmaps will be informed by the Advanced Propulsion Centre’s Technology Roadmaps (currently under a revision process) (see [link](#))
